## A. PRAKTIKUM

### 1) Login

#### a. membuat Jframe Login

#### b. code tombol masuk

```
[private void btnMasukActionPerformed(java.awt.event.ActionEvent evt) {
    if (txtUsername.getText().equals("")) {
        JOptionPane.showMessageDialog(this, "Isi Semua Data!",
        "Peringatan", JOptionPane.WARNING_MESSAGE);
    } else if (new String(txtPW.getPassword()).equals("")) {
        JOptionPane.showMessageDialog(this, "Isi Semua Data!",
        "Peringatan", JOptionPane.WARNING_MESSAGE);
    } else {
        try {
            EntityManager em = emf.createEntityManager();
            em.getTransaction().begin();

            TypedQuery<Pw> query = em.createQuery(
                "SELECT a FROM Pw a WHERE a.username = :u AND a.password = :p", Pw.class);
            query.setParameter("u", txtUsername.getText());
            query.setParameter("p", new String(txtPW.getPassword()));

            List<Pw> hasil = query.getResultList();

            if (!hasil.isEmpty()) {
                JOptionPane.showMessageDialog(this,
                "Login berhasil! Selamat datang, " + txtUsername.getText() + ".",
                "Sukses", JOptionPane.INFORMATION_MESSAGE);

                new tugaspl44.DataPenduduk().setVisible(true);
                dispose();
            } else {
                JOptionPane.showMessageDialog(this,
                "Username atau Password salah!",
                "Gagal Login", JOptionPane.ERROR_MESSAGE);
            }

            em.getTransaction().commit();
        } catch (Exception e) {
            JOptionPane.showMessageDialog(this,
            "Terjadi kesalahan koneksi ke database: " + e.getMessage(),
            "Error", JOptionPane.ERROR_MESSAGE);
        }
    }
}
```

### 2) Daftar Akun

#### a. Membuat Jdialog Daftar

- b. Kode pada tombol buat dengan tambahan nama ibu dan konfirmasi password

```

private void btnMasukActionPerformed(java.awt.event.ActionEvent evt) {
    String pw1 = new String(txtPWD1.getPassword()).trim();
    String pw2 = new String(txtPWD2.getPassword()).trim();
    char[] p1 = txtPWD1.getPassword();
    char[] p2 = txtPWD2.getPassword();

    if (txtUsername.getText().equals("")) {
        JOptionPane.showMessageDialog(this, "Isi Semua Data!",
        "Peringatan", JOptionPane.WARNING_MESSAGE);
    } else if (pw1.equals("")) {
        JOptionPane.showMessageDialog(this, "Isi Semua Data!",
        "Peringatan", JOptionPane.WARNING_MESSAGE);
    } else if (pw2.equals("")) {
        JOptionPane.showMessageDialog(this, "Isi Semua Data!",
        "Peringatan", JOptionPane.WARNING_MESSAGE);
    } else if (txtIbu.getText().equals("")) {
        JOptionPane.showMessageDialog(this, "Isi Semua Data!",
        "Peringatan", JOptionPane.WARNING_MESSAGE);
    } else if (!Arrays.equals(p1, p2)) {
        JOptionPane.showMessageDialog(this,
        "Password dan Konfirmasi Password tidak sama!",
        "Peringatan", JOptionPane.WARNING_MESSAGE);
    } else {
        try {

            EntityManager em = emf.createEntityManager();
            em.getTransaction().begin();

            Pw a = new Pw();
            a.setUsername(txtUsername.getText());
            a.setPassword(new String(txtPWD1.getPassword()));
            a.setIbu(txtIbu.getText());

            em.persist(a);
            em.getTransaction().commit();

            JOptionPane.showMessageDialog(this, "Akun " + txtUsername.getText() + " berhasil dibuat!");
            bersih();
            dispose();
        } catch (Exception e) {
            JOptionPane.showMessageDialog(this, "Error: " + e.getMessage());
        }
    }
}

```

### 3) JDialog Ubah Password

a. Kode pada tombol ubah

```

221
222
223
224
225
226
227
228
229
230
231
232
233
234
235
236
237
238
239
240
241
242
243
244
245
246
247
248
249
250
251
252
253
254
255
256
257
258

private void btnUbahActionPerformed(java.awt.event.ActionEvent evt) {
    String pwl = new String(txtPW1.getPassword()).trim();
    String pw2 = new String(txtPW2.getPassword()).trim();
    char[] p1 = txtPW1.getPassword();
    char[] p2 = txtPW2.getPassword();

    if (pwl.equals("")) {
        JOptionPane.showMessageDialog(this, "Isi Semua Data!",
            "Peringatan", JOptionPane.WARNING_MESSAGE);
    } else if (pw2.equals("")) {
        JOptionPane.showMessageDialog(this, "Isi Semua Data!",
            "Peringatan", JOptionPane.WARNING_MESSAGE);
    } else if (!Arrays.equals(p1, p2)) {
        JOptionPane.showMessageDialog(this,
            "Password dan Konfirmasi Password tidak sama!",
            "Peringatan", JOptionPane.WARNING_MESSAGE);
    } else {
        try {
            EntityManager em = emf.createEntityManager();
            em.getTransaction().begin();

            Pw a = em.find(Pw.class, txtUsername.getText());
            a.setPassword(new String(txtPW1.getPassword()));

            em.merge(a);
            em.getTransaction().commit();

            JOptionPane.showMessageDialog(this, "Password berhasil diubah!");
            dispose();
        } catch (Exception e) {
            JOptionPane.showMessageDialog(this,
                "Terjadi kesalahan koneksi: " + e.getMessage(),
                "Error", JOptionPane.ERROR_MESSAGE);
        }
    }
}

```

b. Kode pada tombol cari dan tambahan JOptionPane konfirmasi nama ibu saat ingin merubah password

```

if (txtUsername.getText().equals("")) {
    JOptionPane.showMessageDialog(this, "Isi Username!",
        "Peringatan", JOptionPane.WARNING_MESSAGE);
} else {
    try {
        EntityManager em = emf.createEntityManager();
        em.getTransaction().begin();

        Pw a = em.find(Pw.class, txtUsername.getText());

        if (a != null) {
            String Ibu = JOptionPane.showInputDialog(
                this,
                "Username ditemukan!"
                + "Masukkan Nama Ibu.",
                "konfirmasi", JOptionPane.INFORMATION_MESSAGE);
            if (Ibu == null) {
                return;
            }
            if (!Ibu.equalsIgnoreCase(a.getIbu())) {
                JOptionPane.showMessageDialog(this,
                    "Nama Ibu tidak sesuai!",
                    "Peringatan", JOptionPane.WARNING_MESSAGE);
                return;
            }
            JOptionPane.showMessageDialog(this,
                "Verifikasi berhasil! Silahkan ubah password.",
                "Informasi", JOptionPane.INFORMATION_MESSAGE);
            jPanel12.setVisible(true);
            txtPW1.requestFocus();
        } else {
            JOptionPane.showMessageDialog(this,
                "Username tidak ditemukan!",
                "Error", JOptionPane.ERROR_MESSAGE);
        }
    } catch (Exception e) {
        JOptionPane.showMessageDialog(this,
            "Terjadi kesalahan koneksi: " + e.getMessage(),
            "Error", JOptionPane.ERROR_MESSAGE);
    }
    em.getTransaction().commit();
}

```

#### 4) Menambahkan fitur Download Data

- Menambahkan tombol download pada tabbed pane tabel

- Kode pada tombol download

```

private void jButton1ActionPerformed(java.awt.event.ActionEvent evt) {
    try {
        if (jTable2.getRowCount() == 0) {
            JOptionPane.showMessageDialog(this, "Tidak ada data untuk diekspor!");
            return;
        }

        JFileChooser chooser = new JFileChooser();
        chooser.setDialogTitle("Simpan Data Mengajar");

        int result = chooser.showSaveDialog(this);

        if (result == JFileChooser.APPROVE_OPTION) {

            String path = chooser.getSelectedFile().getAbsolutePath();

            if (!path.toLowerCase().endsWith(".csv")) {
                path += ".csv";
            }

            exportToCSV(jTable2, path);

            JOptionPane.showMessageDialog(this, "Data berhasil diekspor ke:\n" + path);
        }
    } catch (Exception e) {
        JOptionPane.showMessageDialog(this, "Gagal ekspor: " + e.getMessage());
    }
}

```

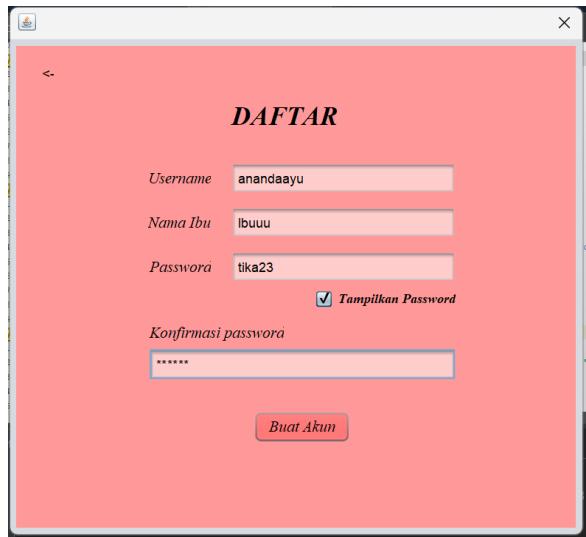

### 5) Tambahkan method untuk menyimpan dalam bentuk .csv

```
public void exportToCSV(JTable table, String filePath) {
    try (FileWriter writer = new FileWriter(filePath)) {
        TableModel model = table.getModel();

        for (int i = 0; i < model.getColumnCount(); i++) {
            writer.append(model.getColumnName(i));
            if (i < model.getColumnCount() - 1) {
                writer.append(",");
            }
        }
        writer.append("\n");
        for (int row = 0; row < model.getRowCount(); row++) {
            for (int col = 0; col < model.getColumnCount(); col++) {
                Object value = model.getValueAt(row, col);
                writer.append(value == null ? "" : value.toString());
                if (col < model.getColumnCount() - 1) {
                    writer.append(",");
                }
            }
            writer.append("\n");
        }
        writer.flush();
        JOptionPane.showMessageDialog(this, "Data berhasil dieksport ke CSV!");
    } catch (Exception e) {
        JOptionPane.showMessageDialog(this, "Gagal ekspor CSV: " + e.getMessage());
    }
}
```

## 6) Output

### a. Tampilan daftar akun

### b. Konfirmasi nama ibu saat ingin mengubah password

c. Saat ingin download data tabel
